

Adarsh G

CSE Graduate — Software Engineer — Machine Learning & Data Science

  +91 93813 48098 —  adarshgandla.tab@gmail.com

 Portfolio —  LinkedIn —  GitHub —  ResearchGate

PROFESSIONAL SUMMARY

Motivated Computer Science graduate specializing in Artificial Intelligence, Machine Learning, and Computational Intelligence. Hands-on experience architecting full-stack machine learning models, data pipelines, and scalable optimization solutions. Proficient in Python, TensorFlow, Scikit-learn, and Google OR-Tools, with a proven track record of deploying live AI applications and publishing technical research. Seeking an entry-level role in software development, data science, or AI engineering to deliver robust, eco-efficient, and data-driven solutions.

TECHNICAL SKILLS

- **CI-Logistics (Domain Expertise):** Computational Intelligence, Logistics Optimization, Route Optimization, Demand Forecasting, Supply Chain Analytics.
- **Core AI & Machine Learning:** Artificial Intelligence, Machine Learning, Deep Learning, Mathematical Optimization.
- **Algorithms & Models:** Long Short-Term Memory (LSTM), Random Forest, Traveling Salesman Problem (TSP), Vehicle Routing Problem (VRP), Demand Clustering.
- **Analytics & Data Science:** Data Science, Predictive Analytics, Time Series Forecasting, Data Preprocessing.
- **Software Engineering & Architecture:** Object-Oriented Analysis and Design (OOAD), Unified Modeling Language (UML), Algorithm Design.
- **Libraries & Frameworks:** TensorFlow, Google OR-Tools, Scikit-Learn, Pandas, NumPy, Matplotlib.
- **Front-End, Languages & Deployment:** Python, Java, C, SQL, HTML, CSS, JavaScript, Vercel, Linux.

EDUCATION

B.Tech in Computer Science and Engineering

Siddhartha Institute of Science and Technology, Puttur, Andhra Pradesh

2022 – May 2026

CGPA: 9.33 / 10.0

- **Honors:** 1st Place Certificate of Merit (1st Year, 2nd Semester Examinations).
- **Key Coursework:** Artificial Intelligence, Machine Learning, Data Warehousing & Mining, Probability & Statistics, Design and Analysis of Algorithms, DBMS, Operating Systems, Computer Networks, Compiler Design.

PROJECTS & PUBLICATIONS

Smart Logistics: AI Route & Demand Optimization Platform

Nov 2025 – Apr 2026

- **Live App:** <https://smart-logistics-v4.vercel.app>
- **Publication:** *Deep Learning-Based Route Optimization and Demand Forecasting for Smart Logistics* published in the International Journal of Emerging Research in Science, Engineering, and Management (IJERSEM).
- Architected a cloud-native, software-only logistics optimization system to solve complex routing and demand prediction challenges for delivery networks.
- Implemented a route optimization engine in Python using Google OR-Tools to model and solve TSP/VRP-style routing scenarios for cost, distance minimization, and eco-efficiency.
- Built and trained an LSTM-based demand forecasting model in TensorFlow to predict product demand across locations and time periods.
- Designed an AI-backed delay prediction module using Random Forest in Scikit-learn to proactively identify potential delivery delays and improve service reliability.

Machine Learning for Agriculture

2024

- Built a crop yield prediction model in Python using Random Forest Regression on historical agricultural and environmental data.
- Performed data cleaning, feature selection, and model evaluation to estimate yield based on soil, climate, and crop features, improving decision support for farmers.

ML-Based Early Skin Cancer Detection (Research Support)

2024

- Provided data processing and programming assistance for a faculty-led research paper on machine learning-based early skin cancer detection.
- Prepared datasets, implemented preprocessing pipelines, and supported experimentation of classification models for lesion image analysis.

Object Oriented Analysis and Design Messaging System

2023

- Led the design and simulation of a robust messaging system mirroring WhatsApp architecture following the full OOAD lifecycle, including requirements analysis, UML design, and system modeling.
- Applied object-oriented principles, design patterns, and modular architecture to improve maintainability and scalability.

INTERNSHIPS & EXPERIENCE

Data Science Intern | *EduNoVerse Tech Solutions, Remote*

Aug 2025 – Oct 2025

- Completed a 120-hour structured internship gaining comprehensive, hands-on exposure to advanced data science methodologies, predictive analytics, and real-world machine learning applications.

Java Programming Intern | *VaultofCodes.in, Remote*

Jan 2024 – Feb 2024

- Developed and debugged Java application modules using object-oriented programming concepts such as classes, inheritance, and interfaces.
- Practiced real-world coding standards, version control, and code reviews to improve code quality and reliability.

Data Science Intern | *Pantech e Learning Pvt. Ltd., Remote*

Dec 2023 – Jan 2024

- Completed a structured data science internship covering the end-to-end data science lifecycle from data collection to model evaluation.
- Used Python, Pandas, NumPy, and Scikit-learn to build a proof-of-concept classification model, including data pre-processing, feature engineering, and metrics-based evaluation.

CERTIFICATIONS, TRAINING & EXTRACURRICULARS

- **Industry Integrated Data Science Workshop:** Exafluence Inc & Sri Venkateswara University (Oct 2025).
- **NPTEL Elite Certification:** The Joy of Computing Using Python (Jul 2024 – Oct 2024).
- **NPTEL Elite Certification:** Problem Solving Through Programming in C (Jan 2024 – Apr 2024).
- **Hackathon Participant:** 24-Hour Siddharth #Hackfest2K25, Microsoft Learn Student Chapter (Mar 2025).
- **Leadership & Coordination:** Coordinated "Artistic Graphs" for Star Techies 2K25 and Spot Events for Siddharth Quest 2K24.
- **Collegiate Athletics:** College Basketball Team player, competed in JNTUA organized tournament.
- **Additional Training:** 1 Month Master Mind Program on Data Science (Jan 2024) & 30 Days Masterclass on AI (May 2023) by Pantech e Learning.
